

March 1910

At the beginning of the College Year -
1909-10 - Thirty Students received physi-
cal examination for entrance to the
gymnasium. While the large majority
of these students were found to be in
good health & in a normal physical
condition, there were some cases of
asymmetrical development or lack
of general strength & development due
to want of previous physical exercise
or to hereditary or other causes, in which
the use of the gymnasium under train-
ed supervision should be especially
helpful.

After Thirty Students already enrolled
were re-examined. Some of these

March 14 10

At the beginning of the College Year -
1909-10 - Ninety Students received physical examination for entrance to the
gymnasium. While the large majority
of these students were found to be in
good health & in a normal physical
condition, there were some cases of
asymmetrical development or lack
of general strength & development due
to want of previous physical exercise
or hereditary or other causes, in which
the use of the gymnasium under trained
supervision should be especially
helpful.

After Ninety students already enrolled
were re-examined. Some of these

showed a marked improvement in
general health & strength & the carriage
of the body. Unfortunately we have had
been unable to take advantage of gym-
nastic instruction during the past
year owing to the time of summer of
these academical lectures but I was
glad to note a general increase of in-
trest & enthusiasm on the part of the
Students in regard to gymnasium
work.

Lelia A. Davis
Medical Examiner
for Annesley Hall Gymnasium
